Office Action Summary

Application No.

09/361,816

Applicant(s)

HANSON ROSE ET AL.

Examiner

Sabiha N. Qazi

Art Unit

1616

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 2/2/04.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☐ Claim(s) _____ is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1616

Final Office Action

Acknowledgement is made for the response filed on 2/2/04. Claims 12-21 are pending. No claim is allowed at this time.

Presently claimed invention is drawn to:

A soil treatment process comprising adding an aqueous soil treatment composition consisting essentially of:

(a) An ionic water-soluble fertilizer in an amount of at least 10 weight percent, and

(b) A water-soluble anionic polymer. Which has the intrinsic viscosity of from 9-12 dl/g and is formed from water-soluble monomer blend comprising 60-80% anionic monomer and from 40 to 20% nonionic monomer, the composition having a viscosity of not more than 4,000 cps, to water, the composition being thereby diluted, and irrigating an area of soil with water.

Arguments were fully considered but are not found persuasive because EP'611 teaches a composition for the treatment of soil and teaches all the components of composition as presently claimed. It teaches the use of fertilizer and polymer as presently claimed. Applicant's response to all the basis of rejection is incomplete. Erythromycin example was given in context to show the obviousness, erythromycin is sold in the market as 2% gel, as 2% solution and as 2% ointment. See page 3060 in "drug, facts and comparisons, 1999 edition, (A Wolters Kluwer Company, St Louis). So the different forms as cited above are optional and would have been obvious at the time of invention.

In absence of showing any criticality and/or unexpected results presently claimed soil treatment process is considered obvious to one skilled in the art at the time of invention for the reasons cited in our actions.

Claims 12-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 586,911 and Sylling et al. WO 85/01938. The references teach a polymeric soil improvement compositions, which embraces applicant's claimed invention. See the entire documents especially lines 10-30 on page 3; examples and claims in Sylling et al. and lines 36-50 and lines 1-30 on page 3; lines 4-40, page 4; Tables and examples.

Art Unit: 1616

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

1. Determining the scope and contents of the prior art.

EP '911 teaches a composition for the treatment of soil containing an anionic fertilizer and anionic polymer such as polyacrylamide and 97 to 0 mole percent of different water-soluble monomer or salts thereof. See the entire document especially lines 36-50 and lines 1-30 on page 3; lines 4-40, page 4; Tables, examples and claims. The composition is added to water prior to irrigating an area of soil. See claims 8 and 10.

WO reference teaches a composition for soil treatment comprising anionic polymeric materials such as copolymers of acrylic acid, methacrylic acid (lines 11-21 on page 4).

2. Ascertaining the differences between the prior art and the claims at issue.

Prior art EP '911 teaches gel composition and instant is aqueous composition. Prior art does not specific viscosity, which is instantly claimed.

3. Resolving the level of ordinary skill in the pertinent art.

Prior art EP '911 teaches gel composition and instant is aqueous composition. These are considered obvious to one who is familiar with the art. Gel or solution form of a composition is considered optional in absence of unexpected results. See for example Erythromycin, which is sold in the market as 2% gel, as 2% solution and as 2% ointment. See page 3060 in "drug, facts and comparisons, 1999 edition, (A Wolters Kluwer Company, St Louis). So the different forms as cited above are optional and would have been obvious at the time of invention.

a) Gels are prepared in large amount of water, see for instance page 1518, (Remington reference), where ephedrine sulfate gel is prepared by adding 830 ml of water for 10.0 gms of ephedrine.

b) The viscosity would be the same for anionic polymer taught by EP '911. It is known that a chemical compound and its properties for example viscosity, melting

Art Unit: 1616

point, density etc. are inseparable to the compound. See *In re Spada*, 15 USPQ (2d) 1655, 1658.

c) Styling reference teaches an aqueous composition.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

One having ordinary skilled in the art would be motivated at the time of invention to prepare beneficial compositions for the improvement of soil because prior art cited above teach the composition useful for the same. There has been ample motivation provided by the prior art to prepare the composition as instantly claimed. Since the viscosity of the prior art is not disclosed, presently claimed invention is considered obvious in absence of showing ant unexpected results.

Claim Rejections - 35 USC § 103

Claims 12-21 stand rejected under 35 U.S.C. 103(a) as being unpatentable over JP 51-124578. The reference teaches an aqueous solution-form soil conditioning fertilizer comprising an acrylamide-potassium acrylate copolymer, which embraces the applicant's claimed invention. The reference also teaches that it is preferred to use the copolymer in an amount of about 0.001 to 0.05% by weight, based on the weight of the soil, but if desired, the copolymer may be used in a larger or smaller amount. See the entire document, especially Section 2 of Page 1, all Examples, and Claims.

Instant claims differ from the prior art in having a generic scope.

One skilled in the art would be motivated to prepare the aqueous solution-form fertilizer as has been presently claimed because the prior art teaches the ranges in concentration and the amount of diluted fertilizer needed for soil aggregation. At the time of invention presently claimed invention would have been obvious to one skilled in the art.

In absence of any criticality and/or unexpected results presently claimed invention is considered obvious over the prior art of record.

Art Unit: 1616

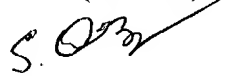

In the light of the forgoing discussion, the Examiner's ultimate legal conclusion is that the subject matter defined by the instant claims would have been obvious within the meaning of 35 U.S.C. 103(a).

Communication

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sabiha N. Qazi whose telephone number is (571) 272-0622. The examiner can normally be reached on any business day.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on (571) 272-0602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
